**Project new industrial hall for Enstaberga Cementgjuteri,
Nyköping, Sweden**

Byggmästarna AB has hired Marupes Metalmeistars A/S together with Steelconstructor LTD for the construction of an industrial hall of 1500 square meters at Enstaberga Cementgjuteri AB. The work performed during the autumn of 2011 included supply and installation of steel frame, walls, roof, rainwater systems etc.

We are very satisfied with the cooperation with the company that has shown great skill all the way from the tender stage, the production stage to final inspection in a very professional, business-like and honest way.

Nyköping day as above
